

CDM REFORM FROM THE PERSPECTIVE OF DNAS

TSHEWANG ZANGMO
BHUTAN

“ Your ideal CDM” and a perfect CDM” from the perspective of developing country

- ◆ Contribute to sustainable development thereby leading to Gross National Happiness
- ◆ Poverty alleviation – employment generation
- ◆ Economic development
- ◆ Environment Conservation
- ◆ For e.g. house hold biogas project
- ◆ Highest emission from livestock as per the GHG inventory
- ◆ Small and multiple benefits

Contd...

- ◆ Bhutan declared to remain carbon neutral for all times
- ◆ Reduce overgrazing thereby enhancing carbon sink
- ◆ Involvement of people at grass root level
- ◆ Address human-wildlife conflict
- ◆ No additional manpower required
- ◆ Reduce dependence of fossil fuel
- ◆ Transaction cost exceeds CER returns

What do you want to accomplish by utilizing CDM?

- ◎ Transfer of technology
- ◎ Financial resources
- ◎ Sustainable ways of energy production
- ◎ Conserve environment
- ◎ Social benefits - poverty alleviation
- ◎ For e.g. CDM pilot project

Any Specific Problems in the CDM

- ⦿ Cumbersome process
- ⦿ Lack of technical capacity
- ⦿ Small scale of the economy
- ⦿ Exorbitant transaction cost
- ⦿ Long duration from the formulation to the project implementation
- ⦿ No consistency in the DNA focal person
