

Panel Questions

- What are your country's experiences in integrating CDM in national development policy and in setting SD criteria for CDM projects? **Have the SD criteria helped or hindered the approval of CDM projects?**
- There is a widespread feeling that CDM projects are being approved in both host countries and Annex I countries without a careful analysis of SD contributions of CDM projects. **How should future climate regime enhance SD benefits from CDM projects?**
- There is a suggestion that projects with high SD benefits but yielding low CERs should be made more competitive than projects yielding high CERs but without much SD benefits. **How can it be done** in the current and/or future climate regime?
- How can we **improve geographic equity of CDM** projects internationally and what type of **host country interventions** are crucial for enhancing SD benefits of CDM projects?
