

# Session 2 Discussion

- Policy makers should aware **clear distinction between recyclables and secondhand goods.**
- **Lifestyle, behavior, living conditions, choice of job** of scavengers/informal sector: distinction is needed for chain linked to scavengers and chain linked to junkshops/recyclers.
- **Estimation of the impact of informal resource recovery activities** will be useful to show their roles to LG.
- Clear synergies between 2 studies is expected: **try to utilize job creation info./**separate the tasks?
- **Socio-economic problems of recycling/resource recovery** (stealing metals etc...). Licensing..
- **Quantitative information on costs/benefits.** If difficult to get data, it is useful to have the possible indicators.
- Mobile phones: almost like a consumer goods
- Involvement of custom officials to discussion on international resource circulation
