

Session 3 Discussion

- Synergies between Prof. Ma's project and IGES Economic modeling project shall be made. But, how? Need to exchange information. How to come up with synergetic scenarios.
- In terms of prediction, way of prediction (scenario-oriented/impact-oriented) is different...
- Data input is too detailed. **Is it possible to develop simpler model?** -> Identify necessary basic data for proper modeling. (Waste-input output is extension of industrial-input output): **Simpler model to show needs for data.**
- **Data-base is important. Message to regional Leader : regional data-base.**
- **How to synergize decision making at national level and needs for regional collaboration.**
- ASEAN countries have often difficulties to implement international collaboration/ policy harmonization. **This research shall contribute to smarter decision by ASEAN and East Asian countries.**
- Homework: Tomorrow, come up how to show synergies.
