Value of University Collaboration in transformative knowledge generation

Dr. Kazuo YAMAMOTO
Vice President for Resource Development, Asian Institute of Technology
Professor, Environmental Science Center, The University of Tokyo

Net working is important.
APAN (Asia Pacific Adaptation Network)
ADAPT Asia-Pacific (USAID Climate Change Adaptation Project Preparation Facility for Asia-Pacific)
AECEN (Asian Environmental Compliance and Environment Network)
ADplanNet-AP (Network for Integrated Planning and Sustainable Development Strategies in Asia-Pacific Region)
LoCARNET (Low Carbon Asia Research Network)
LCA-Rnet (International Research Network for Low Carbon Societies)
Academic Community in Generating New Knowledge for Adaptive Development

Only Networking is not enough.

Deepening Knowledge & Break-through Technology at each node is necessary.
University & Institute collaboration drives creation of transformative knowledge.

Any creation should come from interaction with different ideas.

Look South East Asia.

Think globally, Act locally. This is always true, especially in the context of adaptive development.

Partnering Asia’s Future
Vision & Mission

VISION:
AIT will strive to become a leading and a unique regional multicultural institution of higher learning, offering state of the art education, research and training in technology, management and societal development.

MISSION:
The mission of AIT in the context of the emerging environment is "to develop highly qualified and committed professionals who will play a leading role in the sustainable development of the region and its integration into the global economy".

19,800+ Alumni from 90+ Countries & Territories
Distribution of Graduates by Gender
