

Efforts to promote Climate change and SDGs Synergies

JICA Global Agenda: JICA's cooperation strategies for global issues

Approach 1: Promote implementation of the Paris Agreement

Approach 2: Co-benefits of climate change

JICA's Co-Benefits Approach to Climate Change refer to :

- Achieve sustainable development while also yielding Co-benefits with Adaptation and Mitigation
- Contribute to Climate Resilient Development (CRD)
- Maximize synergies and Minimize potential trade-offs with sustainable development natural environment and biodiversity

	1. No Poverty	2. Zero Hunger	3. Good Health and Well-being	4. Quality Education	5. Gender Equality	6. Clean Water and Sanitation	7. Affordable and Clean Energy	8. Decent Work and Economic Growth	9. Industry, Innovation and Infrastructure	10. Reduced Inequalities	11. Sustainable Cities and Communities	12. Responsible Consumption and Production	13. Climate Action	14. Life Below Water	15. Life on Land	16. Peace, Justice and Strong Institutions	17. Partnerships for the Goals
Climate Action by Sector	1. No Poverty	2. Zero Hunger	3. Good Health and Well-being	4. Quality Education	5. Gender Equality	6. Clean Water and Sanitation	7. Affordable and Clean Energy	8. Decent Work and Economic Growth	9. Industry, Innovation and Infrastructure	10. Reduced Inequalities	11. Sustainable Cities and Communities	12. Responsible Consumption and Production	13. Climate Action	14. Life Below Water	15. Life on Land	16. Peace, Justice and Strong Institutions	17. Partnerships for the Goals

Analysis of Synergies and Tradeoffs

- JICA climate actions has great potential of Synergies
- Tradeoffs can be minimized by existing Guidelines
- Synergies and Tradeoff relationship are context specific
- There are still challenges on how to harness synergies and minimize tradeoffs

Synergy

Synergy and Tradeoff

Case1 Flood control in the metropolitan area of Manila, Philippines

Specific Efforts

- Capacity building and facility development for
 - Climate risk assessment
 - Prediction and early warning
 - Rapid response preparedness
- Proactive investments in
 - Climate risk prevention and reduction
 - Infrastructure development

Synergies

- Increase Resilience
- Reduce poverty
- Improve health
- Resilient Cities
- Improve sanitation

Potential Tradeoffs

Impact on Environment

(Minimized by JICA Guidelines for Environmental and Social Considerations)

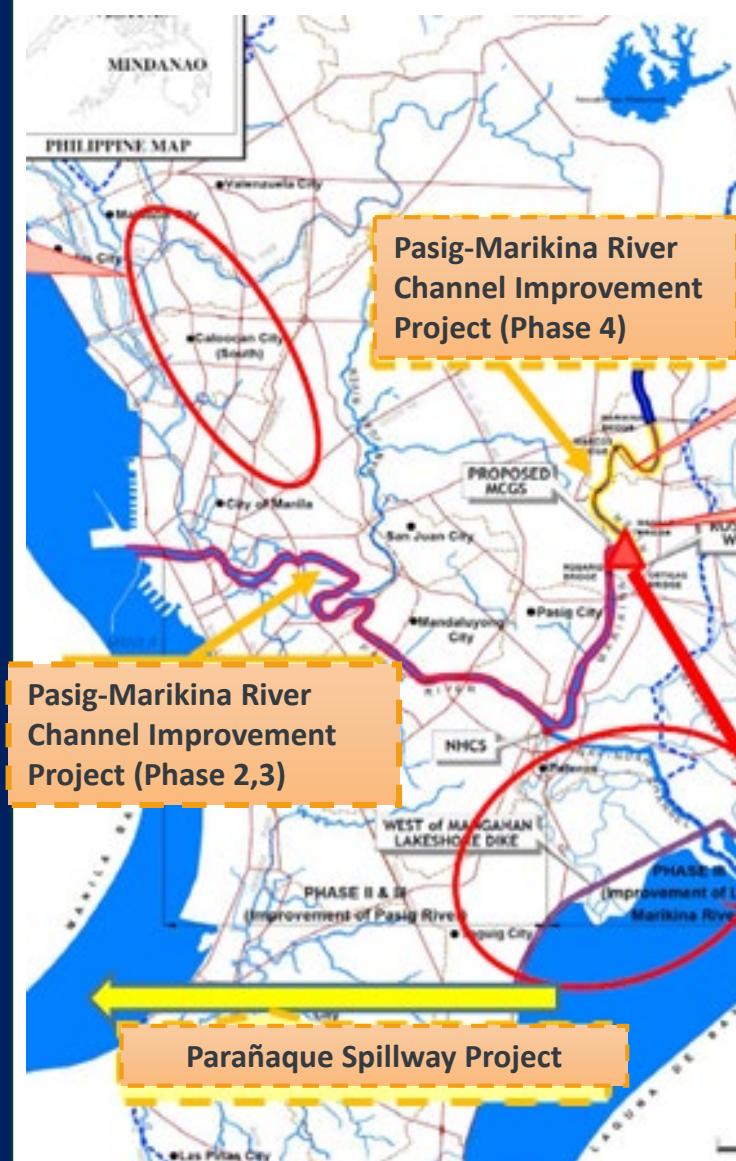

Impact on Health

(Minimized by Monitoring water, air quality)

Gender

(Minimized considering gender equality during planification)

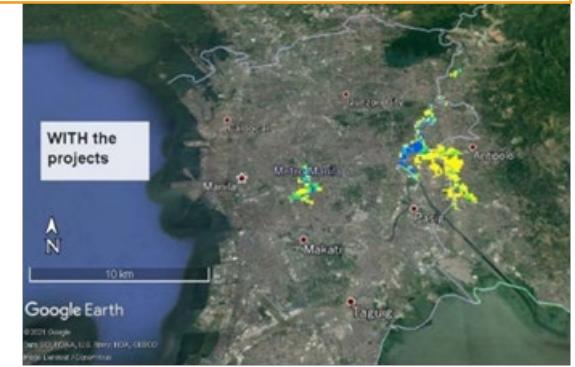

Technical cooperation, Loans and Grants were combined to respond integrative to climate risk (Weather forecasting, disaster prevention and risk reduction)

Flooded area without project

Flooded areas based on project effectiveness

Damage: USD 200 million
Victims: 30 thousands

Formulation of master plan for flood control, construction of flood control infrastructure and training

Case2 Gulf of El Zayt Wind Power Plant Project, Egypt

Specific Efforts

- **Establishment of Wind Farm**
 - 110 turbines (2MW/turbine)
 - Total output of 220MW
 - GHG emission reduction' 494,000 tons/year
- **Expansion of Substation**
 - Upgrading of the existing 220KV substation by 250 MVA capacity for the interconnection of the electricity generated to the grid.

Synergies

GHG emission reduction

Affordable and Clean energy

Economic Growth

Reduction of Fossil Fuel Consumption

Potential Tradeoffs

Impact on Environment

(Shutdown on Demand to Minimize impacts on wildlife, Environment and Social Consideration Guideline)
