The new target aims to reduce GHG emissions by 60% by 2035 and 73% by 2040, compared to 2013 levels.

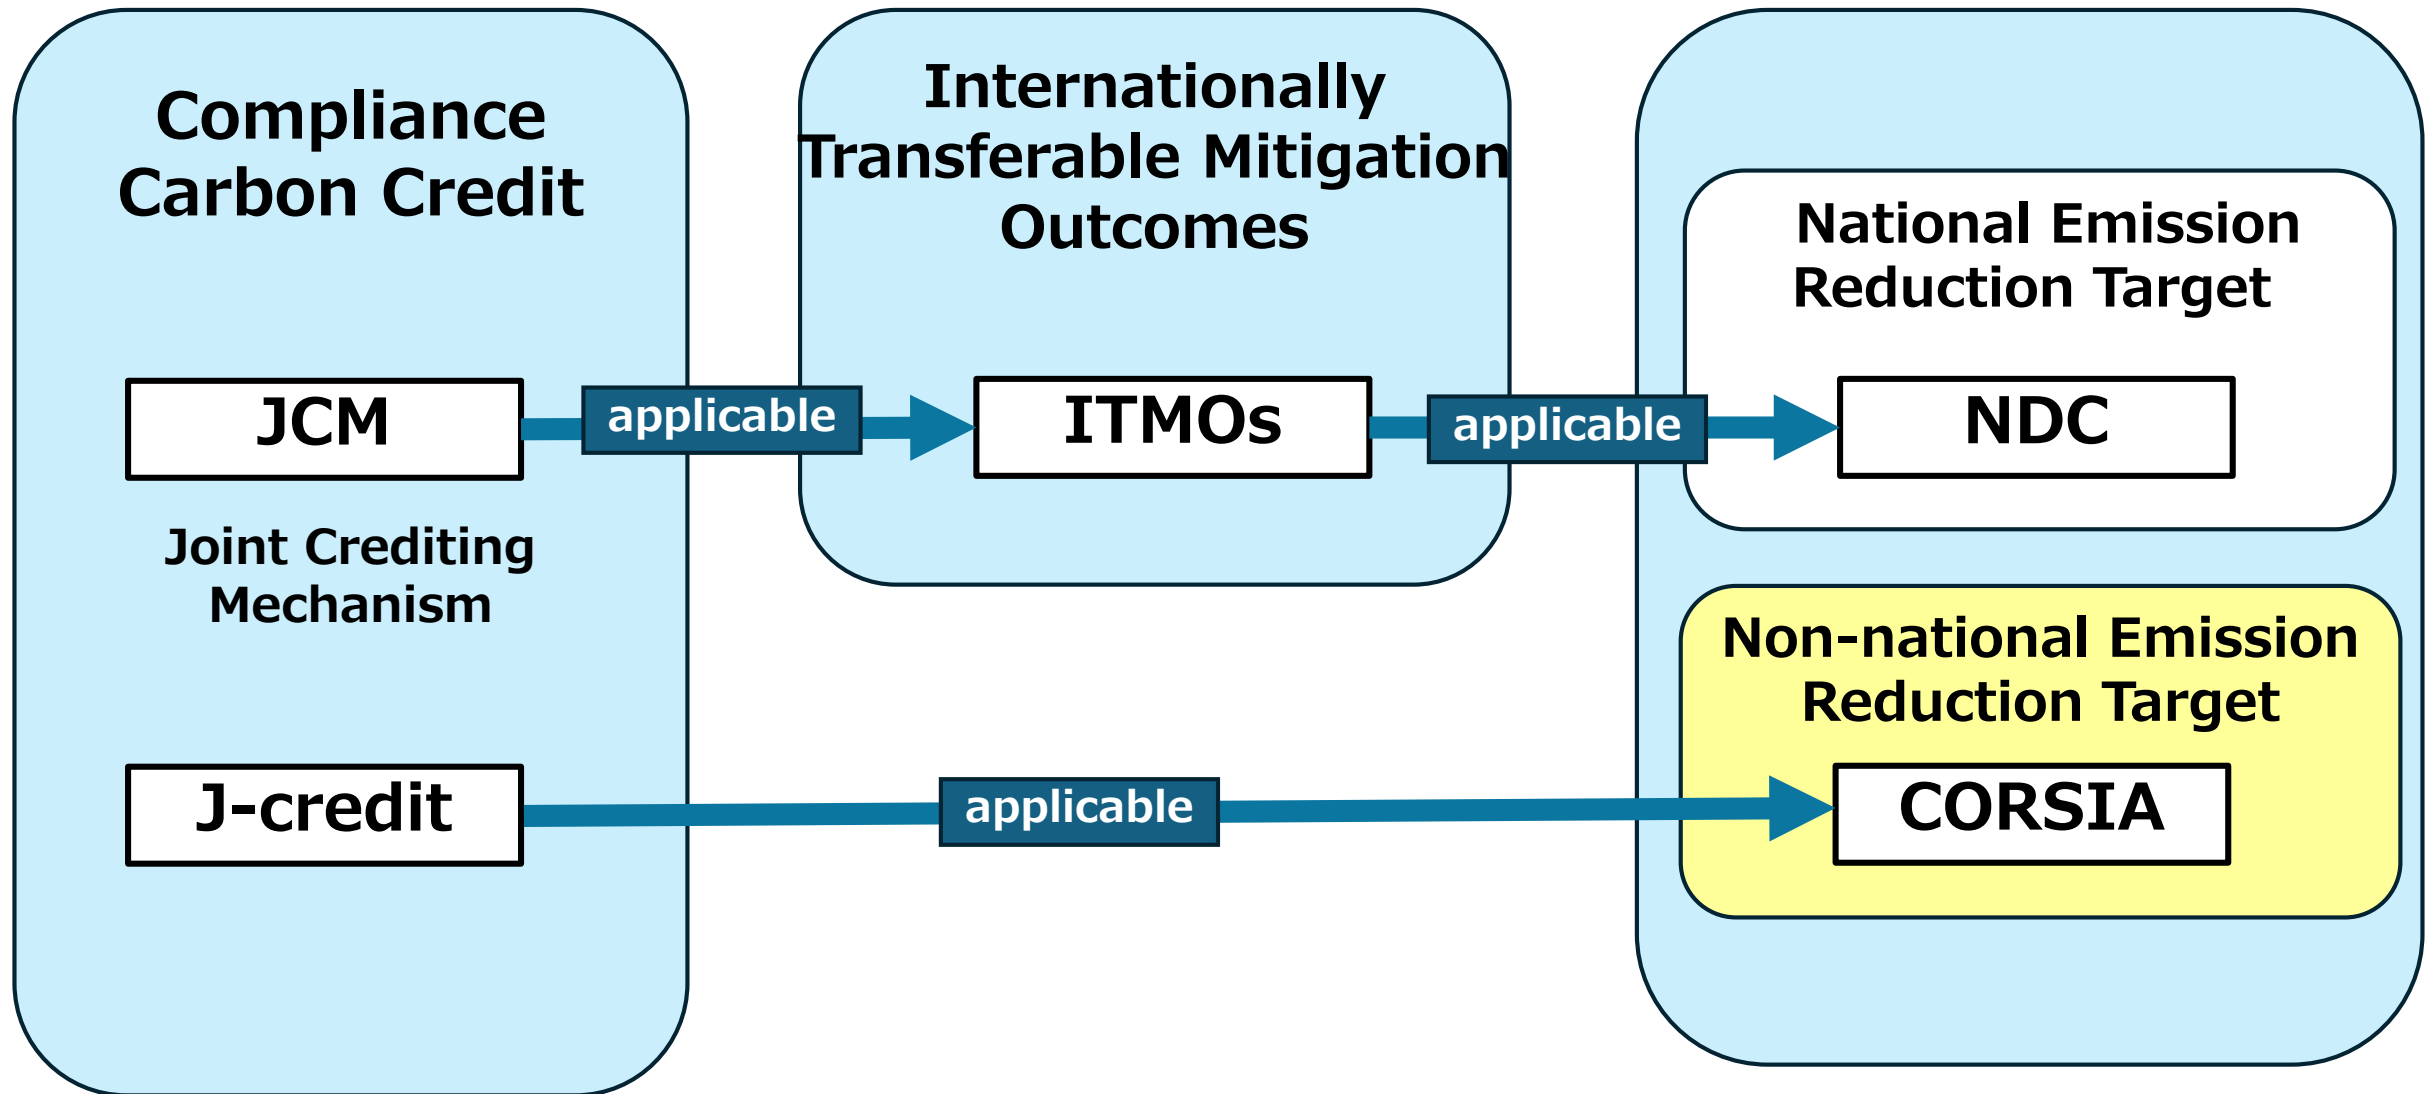

Japan's Nationally Determined Contribution (NDC)

Japan's Greenhouse Gas Emission Reduction Target

Japan aims to reduce its greenhouse gas emissions by 60 percent in fiscal year (FY) 2035 and by 73 percent in FY 2040, respectively, from its FY 2013 levels, as ambitious targets aligned with the global 1.5°C goal and on a straight pathway towards the achievement of net zero by 2050¹.

The details of the action policy as well as targets and estimates by greenhouse gases and other classifications are described in the *Plan for Global Warming Countermeasures*, which is a comprehensive implementation plan for achieving Japan's NDCs², and in its related materials.

最後に、本インターンシップを支援してくださったすべての関係者の皆様に感謝申し上げます。初めての海外への渡航を通じて、異国の地でそれぞれの役割を果たされ、ご活躍されている日本人を間近に見ることができました。誇らしく思ったと同時に、私も日本人の一人として日本のみならず世界に残っている様々な社会課題解決のために頑張っていきたいと思っています。

Finally, I would like to express my gratitude to everyone who supported this internship program. This was my first experience traveling abroad, and it gave me the opportunity to witness Japanese professionals working in a foreign country, each fulfilling their own roles. As a Japanese citizen, I am inspired to contribute not only to Japan but also to solving various social issues around the world.
