Jetwing Hotels' Sustainability Strategy - Key Focus Areas

Resource
Efficiency

Focus on **resource optimization** and management to reduce consumption as well as increase reusability of waste produced on our sites

Impact
Sourcing

Dedicated to minimising imports, supporting the local economy, internalizing the supply chain wherever possible and **encouraging supplier responsibility**

[illegible]

- *Rethinking Plastics*

Success Stories

Plastic – Water Bottles

Replaced by:

- Purchased (reusable) glass water bottles
- Onsite produced (reusable) glass water bottles
- Long stays - Refillable bottles, with access to water dispenser

Plastic – Water Bottles

Onsite Water Purification Process

Washing / cleaning → Filling → Capping → Quality checking → Use

Replaced with,

- Reusable bags (e.g. material – taffeta)

Eliminated,

- Use of garbage bags as bin liners

Beach Clean-ups

- Collection of plastic waste along the coast, and other popular tourist sites
- Segregated waste items sent to recyclers

- *Rethinking Plastics*

Challenges

Food Wrap / Cling film

- Varied uses - Cover displayed dishes, wrap portioned items or leftovers in storage, in meal-prep, as a mould liner etc.
- (Food) contaminated PE – not readily recycled
- Where possible, replace with reusable containers or covers

Packaging / Supply Chain

- Printed polythene (most packaging) – not readily recycled
- Improve supplier awareness and responsibility
- Actively discourage secondary packaging

Thank You!
