

WHAT IS KOBOTOOL BOX?

5th June 2025

**KOBOTOOLBOX APPLICATION FOR
WASTE DISPOSAL SITES RECORDING
PURPOSES**

1. OBJECTIVES:

- Use of the Kobotoolbox Application to digitize waste disposal sites incoming waste information.
- How to setup up your Waste Disposal Site Recording System.
- How to extract the data and information for management and planning purposes.
- What you need to set up and run your system.
- Other Data Collection purposes.

1.1.What is Kobotoolbox.

An open-source online platform:

- Was developed by the Harvard Humanitarian Initiative.
- Designed for collecting, managing, analyzing, and visualizing data in the field.
- Allows users to gather data offline or online using mobile devices and web browsers.
- popular tool for humanitarian, development, and environmental research projects.

1.2. Key Functions:

- It creates digital forms for data collection.
- Collect data on mobile devices even without internet connection.
- Review data in real-time, and generate reports and visualizations for rapid decision-making purposes.

1.3. Key features:

- Offline data collection capability
- Customizable forms with various data types (text, numbers, dates, locations, photos, videos, audio, documents, etc.)
- Real-time data review and validation
- Data visualization tools including maps and charts
- Data export options in various formats like CSV, XLS, KML

2. COMMON METHODS OF WASTE RECORDING IN PICS

MANUAL	ADVANTAGE	DISADVANTAGE
1. Paper based system	<ul style="list-style-type: none">• Cheapest and easiest setup.	<ul style="list-style-type: none">• Level of accuracy depends on the recorder's judgment.• Time consuming to enter the data in a computer.• Information is usually not entered in many cases in PICs.• Information is usually lost
2. Weighing Bridge	<ul style="list-style-type: none">• More accurate.• Does not rely on the operator's judgment	<ul style="list-style-type: none">• Expensive to setup.• Expensive to operate and maintain.• Cannot operate without a power
3. Kobotoolbox	<ul style="list-style-type: none">• Easiest to use.• Can record many information• Information is accessible online.• The recorded data can be analysed within minutes	<ul style="list-style-type: none">• Level of accuracy depends on the operator's judgment.

Both Kobotoolbox and Weighing Bridge System promotes Digitizing Data and information.

Collecting, managing and storing records in electronic formats. It involves creating, organizing, and preserving records throughout their lifecycle.

Why use digital record keeping?

- Efficiency:** Digital record keeping can make it easier to organize, access, and preserve information.
- Collaboration:** Digital record keeping can make it easier for people to work together on projects.
- Reduced paper use:** Digital record keeping can reduce the need for paper

3. KOBOTOOLBOX SYSTEM.

1st YOUR COMPUTER – AS THE SERVER

A **server** is a **computer** that provides data to other computers and android devices like smartphone and tablets.

- Develops data collection forms, activate and make available for gathering data remotely using computer or android devices (smartphones and tablets).
- Receives filled forms with data and information submitted from other computers, smartphones and tablets.
- Analyzes and summarizes the received data and information, which can be used for reporting and decision making purposes.

2nd CLOUD – INTERNET OR NETWORK

It is a technology that uses remote servers on the internet to:

- Store, manage, and access data online.
- The data can be anything such as files, images, documents, audio, video, more.

3rd SMARTPHONES, TABLETS AND COMPUTERS.

Computer and other android devices such as smartphones and tablets used to feedback the needed data and information (i.e. Documents, images, videos, audio, etc.).

- The Kobotool Collection Forms can collect all of the above – documents, images, videos, audio, etc.
- Download the Kobotool Form and fill with all these data.
- Upload and send the completed forms back to the server.

4th CLOUD – INTERNET OR NETWORK

Online storage of the filled forms with the collected data and information uploaded from the smartphones, tablets or computers in the field.

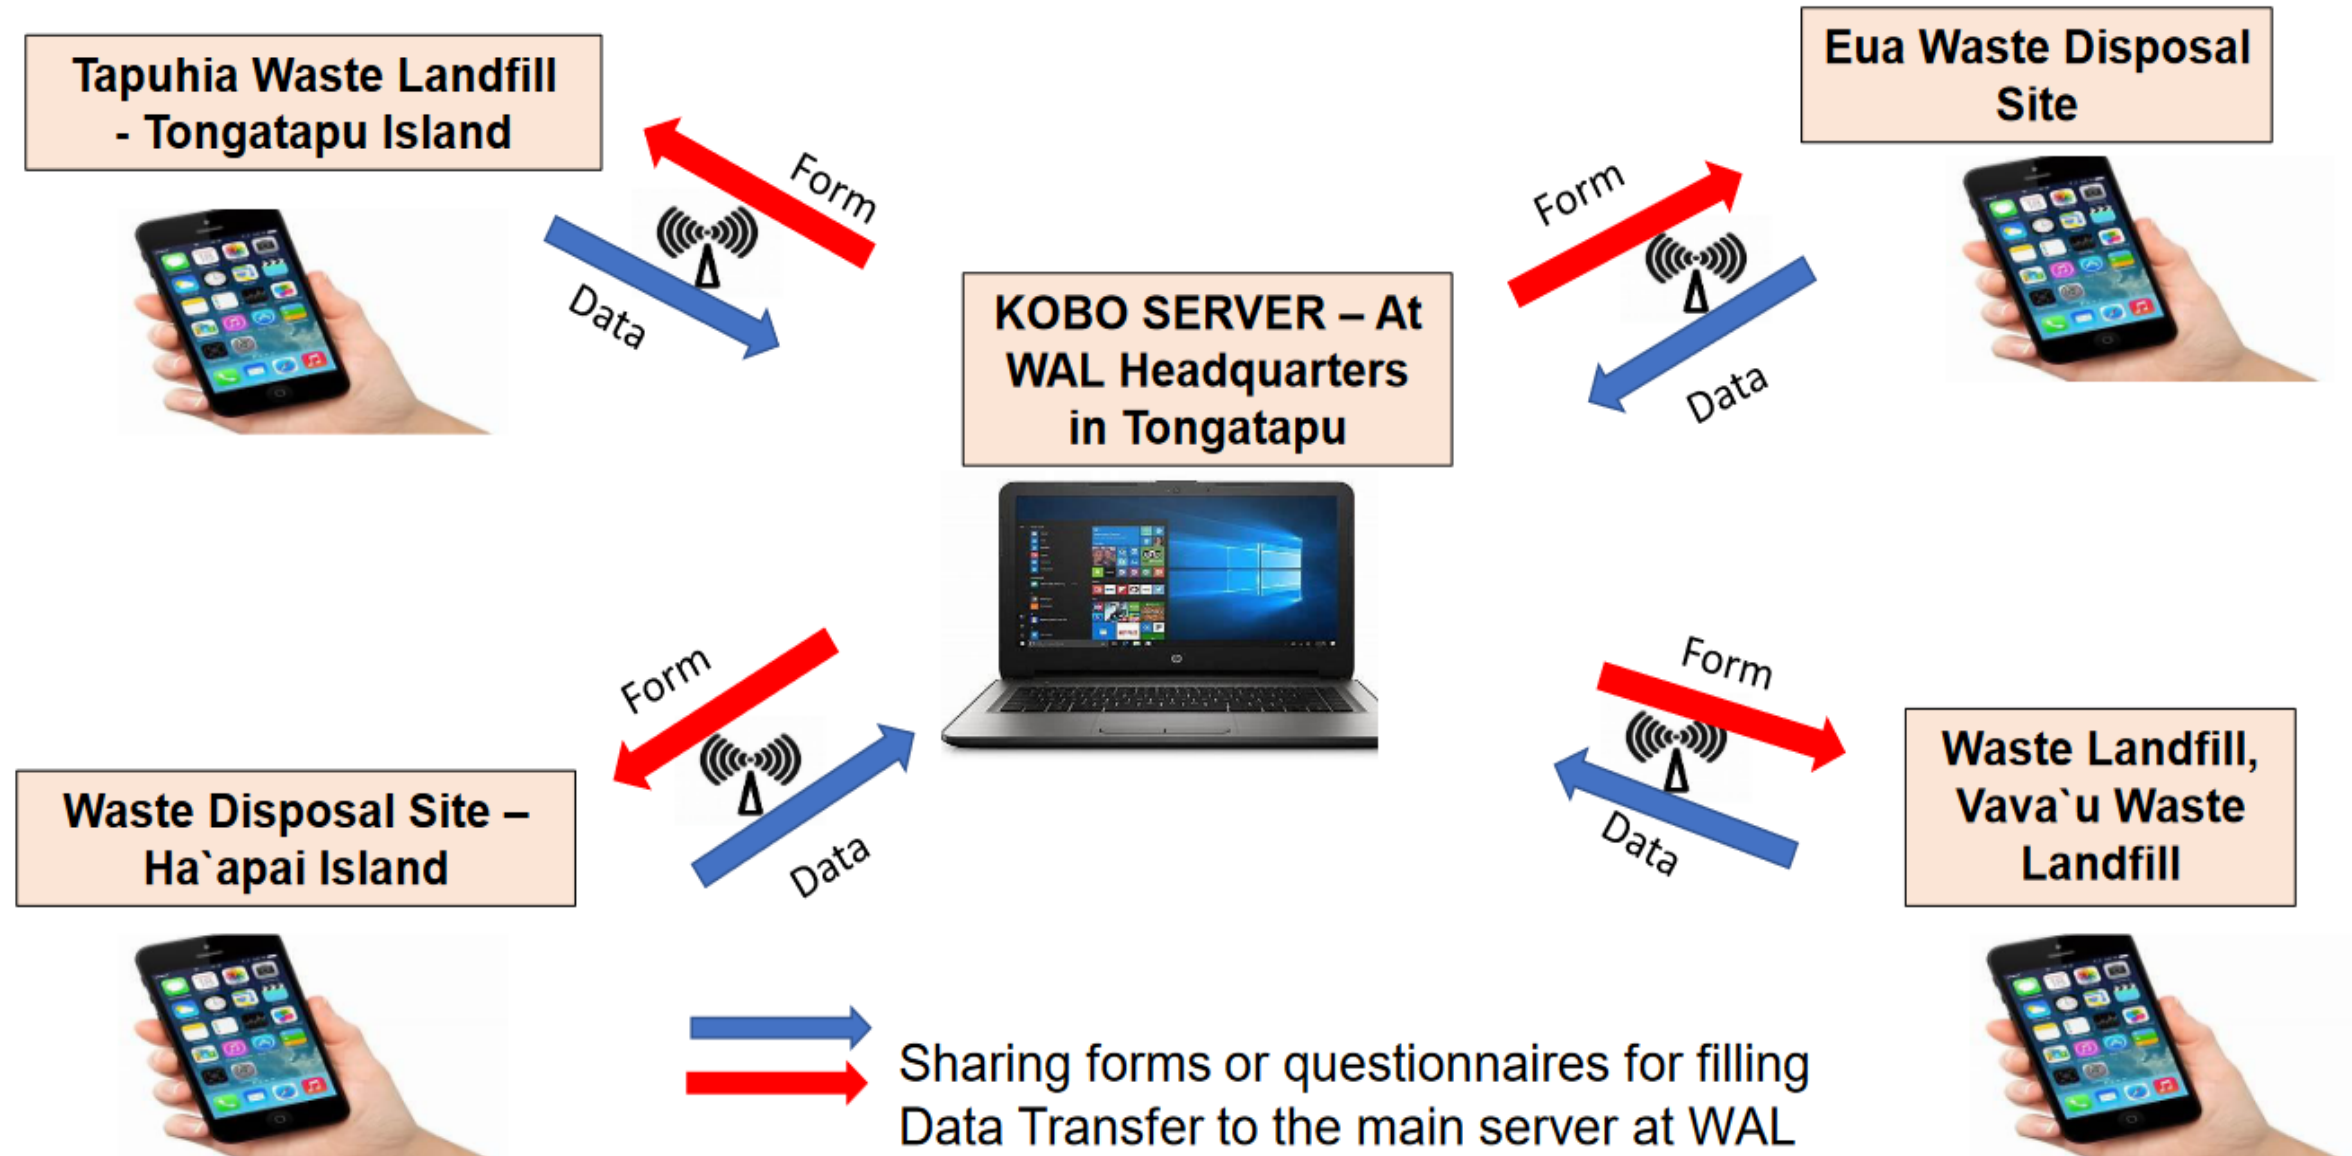

5th YOUR COMPUTER - SERVER

Receives the uploaded filled forms, analyzes the received data and information and can be extracted for reporting purposes.

6th ANALYSED AND SUMMARIZED DATA AND INFORMATION

Gathered information provides the basis of key reporting documents for organizations and government decision makings.

EXAMPLE OF A DEVELOPED SYSTEM FOR TONGA

Central System for all the Waste Landfills in Tonga

SETTING UP OF YOUR WASTE LANDFILL RECORDING SYSTEM

Step 1: Go to <https://www.kobotoolbox.org/>

STEP 2: Go to the SIGN UP Icon (Top left corner of your screen)

Sign in or create an account

Global KoboToolbox Server

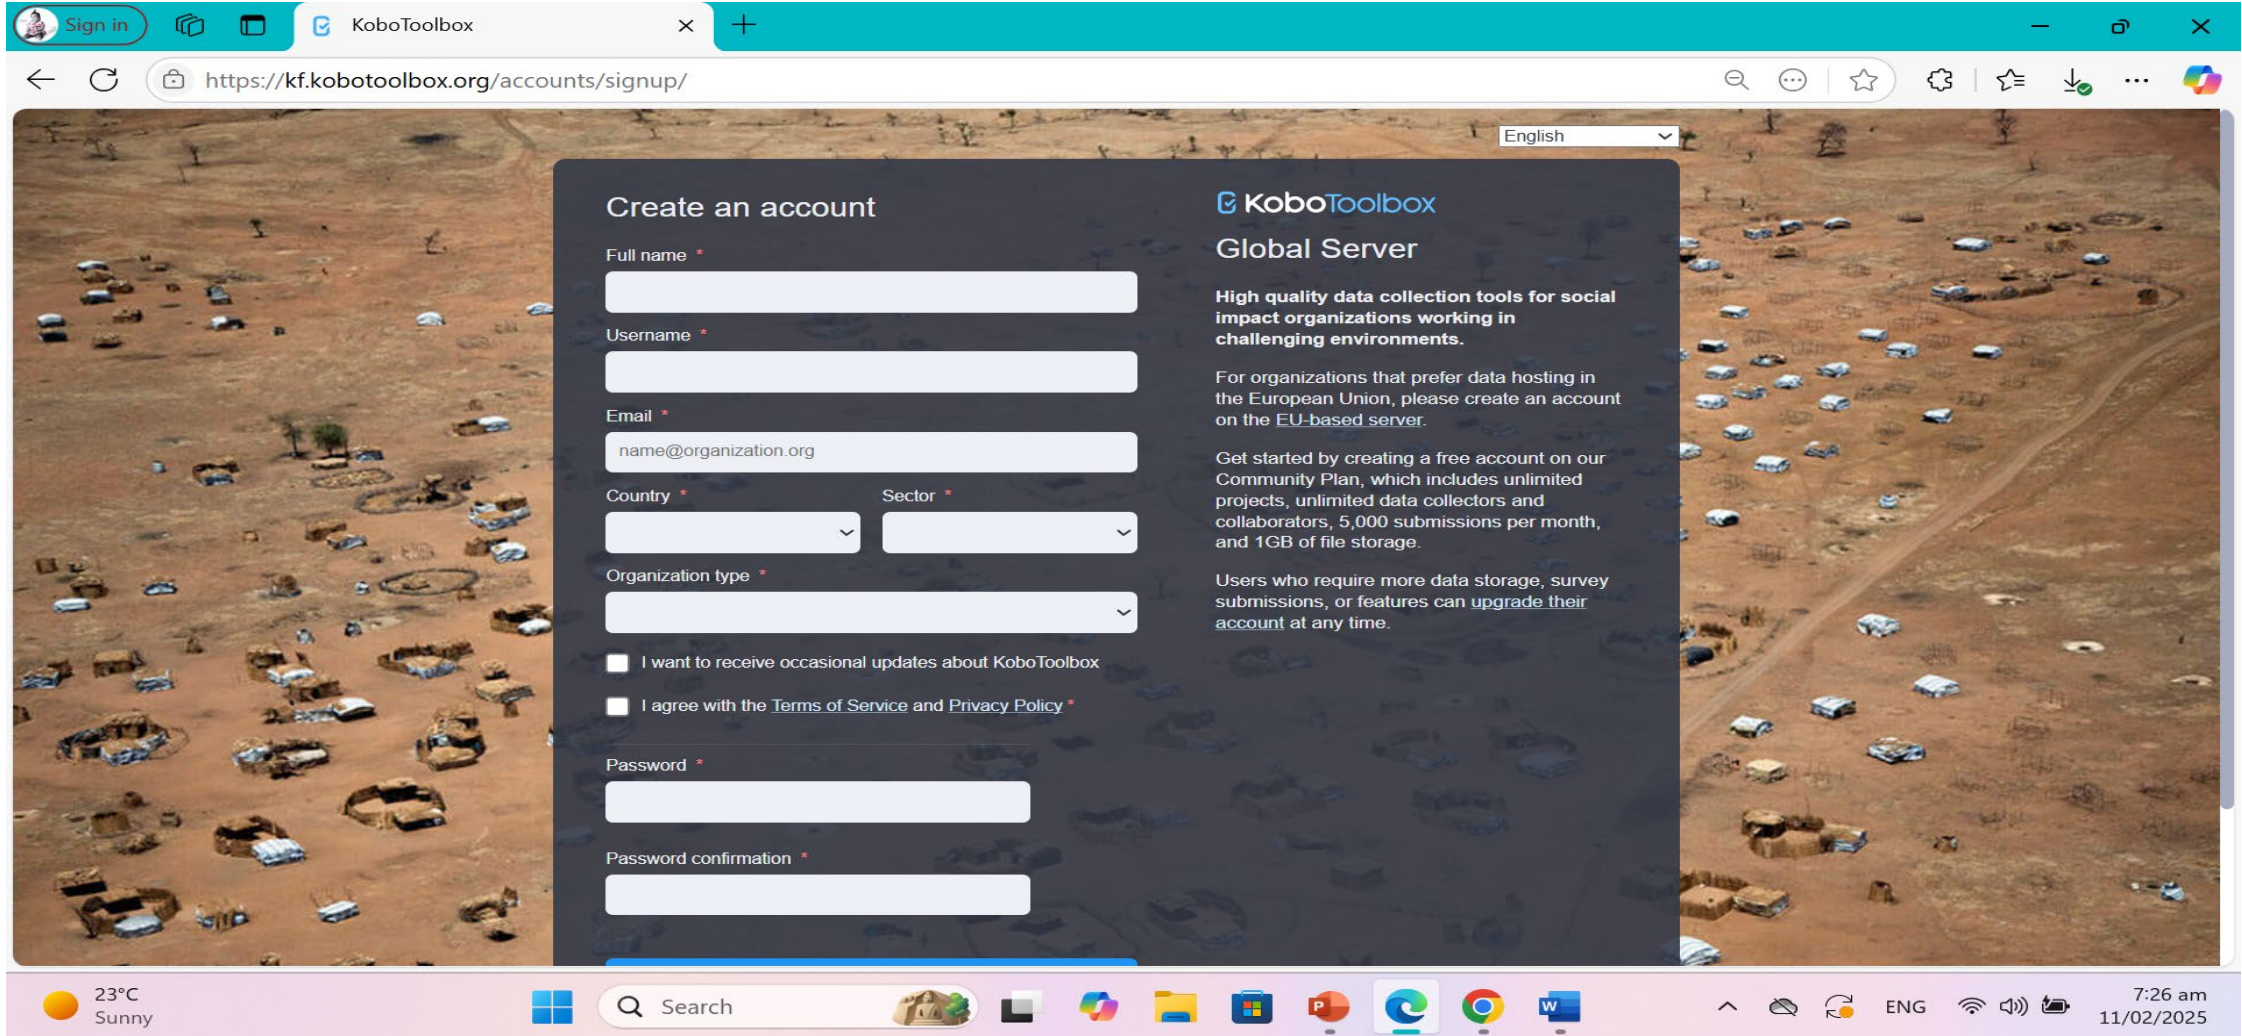

Most people use our global KoboToolbox server. Get started with a free account today.

European Union KoboToolbox Server

The European Union-based server is hosted in Ireland. This server is used by organizations that require or prefer data hosting in the European Union. Get started with a free account today.

STEP 3: Go to the Global Kobotoolbox Server & Select the CREATE AN ACCOUNT

The screenshot shows a web browser window with the KoboToolbox Global Server account creation page. The browser's address bar shows the URL <https://kf.kobotoolbox.org/accounts/signup/>. The page has a dark background with a light-colored form overlay. The form is titled "Create an account" and includes fields for Full name, Username, Email, Country, Sector, Organization type, Password, and Password confirmation. There are also checkboxes for receiving updates and agreeing to terms. To the right of the form, the KoboToolbox logo and "Global Server" text are displayed, along with a description of the server's purpose and a link to the EU-based server. The background of the page is an aerial view of a dry, arid landscape with small, scattered structures.

STEP 5: Create your Data Collection Form Project

The screenshot displays the KoboToolbox web application. The browser's address bar shows the URL `kf.kobotoolbox.org/#/projects/home`. The page header includes the KoboToolbox logo and a search bar. On the left sidebar, there is a prominent blue button labeled "NEW" and a list of project status filters: "Deployed" (0), "Draft" (0), and "Archived" (0). The main content area is titled "My Projects" and features a table with the following columns: "Project name", "Status", "Owner", "Date modified", "Date deployed", and "Submissions". The table is currently empty, with the text "There are no projects to display." centered below the column headers. In the top right corner of the page, there are icons for mail, user profile, and a trash can.

STEP 6: Go to NEW at the left top corner (for NEW PROJECT)
