

HOW TO STIMULATE SDG7 ACHIEVEMENT BY 2030?

- From the perspective of developing Asia

ACT LOCAL

2.6 million Improved Cook Stoves installed in Bangladesh under IDCOL ICS Program

Each ICS saves 1.54 ton biomass fuel and 1.22 ton of GHG emission per year

SUSTAINABLE BUSINESS MODEL

5 million + Solar Home Systems installed in Bangladesh under IDCOL SHS Program

A targeted grant initiative of the Government ensured that no one is left behind.

Mr. Nazmul Haque is the Chief Investment Officer of IDCOL and has 20 years of experience in developing/financing sustainable infrastructure, renewable energy and energy efficiency projects.

IDCOL is a government owned DFI in Bangladesh with specific mandate to develop and finance private sector infrastructure, RE & EE Projects.

HOW TO STIMULATE SDG7 ACHIEVEMENT BY 2030?

- From the perspective of developing Asia

ACCEPT LIMITATIONS & EVOLVE

Unavailability of suitable land is a major limitation for Bangladesh to install large grid-tied solar IPPs

Thousands of unused industrial rooftops, affordable technology, attractive financing scheme and net-metering policy has boosted investment in solar rooftops.

INNOVATION VS. ADOPTION

Innovation is a lengthy and costly process and fast adoption of EE technologies is critical to avoid locked in investment

IDCOL launched low cost EE financing scheme for industries and buildings following available global best practice.

MORE TO CONSIDER.....

- Post pandemic realignment of realistic SDG achievement targets
- Setting of country-specific prioritization of targets
- Better cooperation and partnership
- Meaningful, cost-effective and sustainable innovation
