# AJSCC – COP 27

**20. STRESS** the need to strengthen support for AMS and other developing countries to analyse climate risks, formulate and implement adaptation measures. We **CALL UPON developed country Parties** to:

- Fulfil their commitment under the Glasgow Climate Pact at COP-26 to at least double their collective provision of climate finance for adaptation to developing country Parties from 2019 levels by 2025;
- *provide enhanced Means of Implementation and support to AMS to formulate and implement their National Adaptation Plans with focus to address gaps and needs and to prepare and communicate their adaptation communications;*
- *provide adequate and sustainable support to AMS to develop their plans related to adaptation and loss and damage, and to take into account the 2030 Agenda for Sustainable Development and the Sendai Framework for Disaster Risk Reduction 2015-2030;*

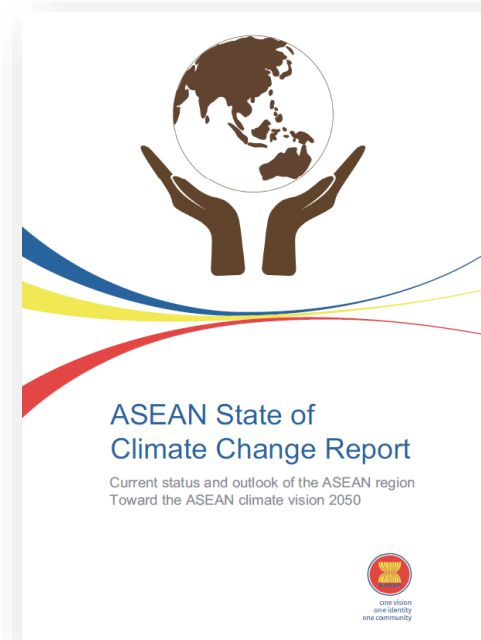

## **2. About the initiative - ASEAN Climate Change Strategic Action Plan (ACCSAP)-2023-2030**

- The **ASEAN State of Climate Change Report** (ASCCR) released in October 2021, containing the “ASEAN Climate Vision 2050” showed ASEAN’s goal and pathway
- The Vision identified prioritised climate actions, 29 adaptation and 30 mitigation actions, for 2030 and 2050
- It is essential to integrate the ASEAN climate actions into a **broader strategic action plan to coordinate and harmonise regional strategies** and national policies to the direction to achieve a long-term climate goal

- This ACCSAP is expected to provide **regional strategic guidance until 2030 to harmonise commitments and accelerate synergised adaptation and mitigation actions toward resilient and net-zero ASEAN Community in line with the ASEAN Climate Vision 2050**, by enhancing the AWGCC Action Plan to align with the current and cross-sectoral developments of international climate agenda
- In order to ensure effectiveness and extended implementation of the ACCSAP, cross-pillar especially across the ASEAN Economic Community (AEC) and the ASEAN Socio-Cultural Community (ASCC), cross-sectoral and cross-country coordination need to be promoted through close collaboration among the AWGCC, ASEAN Secretariat Divisions, ASEAN sectoral bodies and ASEAN Dialogues and Development Partners
- Proposed **outcomes**: ASEAN Climate Change Strategic Action Plan 2023-2030 (ACCSAP)

### **3. Recent Developments of ACCSAP**

- 
- The Concept Note for ACCSAP was deliberated at the **13<sup>th</sup> AWGCC Meeting**, whereby the Meeting noted the initiative and inputs from AMS, including to clearly elaborate the linkages between the proposed ACCSAP with the existing AWGCC Action Plan to avoid a duplication of action plans
  - The ACCSAP is proposed to be equipped with a **Guiding Document**, which is developed with support from MOEJ and IGES, in parallel to the development of ACCSAP Proposal
  - The Guiding Document contains the background information, proposed approach and timeline for the ACCSAP development
  - The updated draft proposal for ACCSAP is under the review of Japan Mission to ASEAN to preliminary indicate their interest to support the project and secure fund, before its circulation to AWGCC NFPs and ASOEN for review and endorsement
