The Voluntary Local Review of the City of Bonn

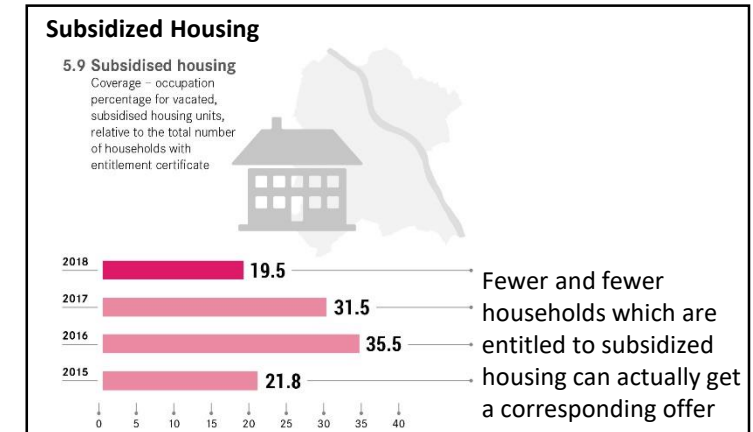

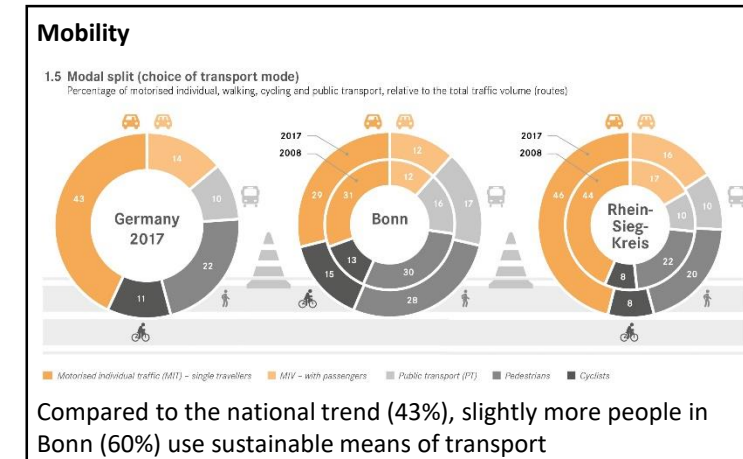

Basic elements

- Published in October 2020
- Based on the existing sustainability reporting
- Linking indicator-based reporting with the objectives of the city's 2030 sustainability strategy
- Structured along six priority fields of action
- Including 46 indicators

Benefits of conducting a VLR – Local Level

- Positive perception of strong visualisation and concise presentation
- Establishment of a first blueprint for advancement of sustainability reporting and starting point for further development
- Growing relevance of sustainability indicators, e.g. in municipal sustainable budget planning, for political decisions
- Can serve as a base for new cooperations, e.g. with universities and companies

Thank you!
