Copy of authorization	Quantitative CAs	Environmental, economic and social impacts
Authorization information	Annual emissions balance/adjusted indicators	Human rights
Avoiding DC, representativeness, and EI of CA	Structured summary (A13)	Safeguards and limits
Contribution to NDC		Adaptation & OMGEs (if applicable)
MOs measurement		

* ITMOs authorization, first transfer, transfer, acquisition, holdings, cancellation, use

 Initial report Annual information

Identify **sources** of information and assess their **availability** (what information is readily available? what is not? where can it be drawn from?)

Determine which information will require national **policy decisions** (such as ITMO metrics and CA method, authorization arrangement)

Assess how the **cooperative approach** (i.e. JCM) addresses each element of the required qualitative information of cooperative approach (EI, SD, safeguards, etc.)

Evaluate readiness in terms of **infrastructure** i.e. registry to track all necessary information

ขอบคุณครับ/ค่ะ

Thank you for your attention
