

Satoyama Initiative – Societies in Harmony with Nature: An inclusive approach for communities, landscapes and seascapes

Thursday- July 16, 2020

8:00 - 9:00 am EST

Accelerated action and partnership from local community to global levels is required to achieve the SDGs and other targets. The Satoyama Initiative was developed as a global effort to contribute and achieve the vision of “societies in harmony with nature” through integrated approaches for biodiversity conservation and sustainable development in the socio-ecological production landscapes and seascapes around the world. This side event will highlight how the initiative helps to accelerate protecting the planet and building resilience (SDGs 13, 14, and 15); advancing human well-being and sharing nature’s economic benefits (SDGs 1 and 10); and fostering partnership (SDG 17).
