

What is CLOMA?

Japan Clean Ocean Material Alliance

Japan Ocean Material Alliance (CLOMA) was established in January 2019, consisting of companies responsible for consumer product supply chains.

Leveraging the technology and knowhow accumulated by Japan's industrial community, **CLOMA endeavors** to accelerate innovation for the 3R (reduce, reuse and recycle) and alternative materials, and to encourage extensive plastic recycling through public-private partnerships. In this way, **CLOMA will** disseminate its "Japan model," a made-in-Japan solution that aims to reduce marine plastic litter to zero in cooperation with consumers and society.

CLOMA ACTION PLAN	60% recycling of containers/packaging*	100% recycling of plastic products**
Key Action 1: Reducing	25% reduction in virgin plastic waste	
Key Action 2: Material Recycling	PET: 100% collection, extensive recycling (100% effective utilization***)	
Key Action 3: Chemical Recycling	Other plastics: 60% recycling	Maximum utilization
Key Action 4: Biodegradable Plastics	Helping to introduce 2 million tonnes of biomass plastics	
Key Action 5: Paper and Cellulose	0.1 million tonnes of alternative materials to replace plastics	1 m tonnes of alternative materials to replace plastics

Worldwide Dissemination

Disseminate the "Japan model" worldwide as a made-in-Japan solution

Standardization of environmentally-compatible design \rightarrow Global promotion -New design standards for "Reduce"

-Design standards for plastic bottles (Consider incorporating into ISO)

-Method to evaluate biodegradability of paper and cellulose materials (Consider incorporating into ISO)

Suntory's Aspiration and Actions

SUNTORY

Based on the Suntory Group Plastic Policy, we will aim to switch all PET bottles used globally for Suntory products to be made of recycled or plant-based material by 2030, achieving zero use of virgin petroleum-based materials.

Recycle & Renewable

- Developing a PET bottle made of 100% plant based materials
- Developing BtoB recycling technologies

Innovating in technologies to allow for recycling of used plastics
