Types and Depths of Engagement

Approach	Definitions
Partnership	Stakeholders participate in decision-making process and/or exert control over resources, through a formal or informal agreement to work together toward common objectives.
Collaboration	Stakeholders and ADB work jointly, but stakeholders have limited control over decision-making and resources.
Consultation	Stakeholder input is requested and considered as part of an inclusive policy, program, or project decision-making process.
Information Generation and Sharing	Information is: (i) generated by ADB/recipient/client and shared with stakeholders; (ii) independently generated by stakeholders and shared with ADB/recipient/client; or (iii) jointly produced.

Healthy Oceans Technology and Innovation Forum

- A 2-day virtual event slated for Q3 2021 showcasing and promoting technology and innovation in and for Asia and the Pacific for ocean health and the blue economy
- Connecting ADB's member countries, science and technology providers, businesses, start-ups, investors, and civil society organizations
- Transferring technologies and practical knowledge solutions to key ocean health challenges

Thank you.
